

The History of eLEAF

eLEAF was originally started by three young collegiate boys. They were hard working, and believed that you only got out of something what you put into it. They joined together and started a landscaping business, and over the next decade refined their system to keep track of all their jobs. That was 75 years ago, and the ideals haven't changed a bit. We believe in making the world a better place, one lawn at a time. We do it, by offering the project management system that has helped keep the company number one for almost a century.
